

Nothing missing from this concept.

Luitpold experienced a double-digit increase in sales on a 15-year-old product line.

Something missing?
Incomplete joint treatments can leave you hanging.

Only Adequan® i.m. (POLYSULFATED GLYCOSAMINOGLYCAN) is a complete treatment—proven to relieve symptoms, protect cartilage structure AND treat the causes of non-infectious equine degenerative joint disease.

Equine degenerative joint disease (EJD) is very complex. When it comes to treatment, relieving some of the symptoms is just part of the picture. A complete medication treats the entire cycle of the disease by protecting the cartilage structure, lubricating the joint and treating the underlying causes. Adequan® i.m.—a disease modifying drug—is the only treatment that does all these things. While other products can get you part way there, only FDA-approved Adequan® i.m. is clinically proven to take treatment further—it's the only complete treatment available.

Here's how it works:

- Adequan® i.m. relieves pain.
- Adequan® i.m. blocks the enzymes that damage joints.
- Adequan® i.m. improves joint lubrication.
- Adequan® i.m. protects cartilage structure and inhibits further degeneration.

For complete treatment, count on the only medication proven to do more—count on Adequan® i.m. The other guys? They just leave you up in the air.

Company | Luitpold Animal Health

Challenge

Luitpold needed to create a brand campaign to continue to raise awareness and interest in Adequan® i.m.; positioning the product as a leading product for treating equine joint disease in competitive horses in a variety of major disciplines.

Solution

LePoidevin Marketing developed the ad campaign to show that “something is missing” when using other products, namely the efficacy of Adequan i.m. To capture this concept, actual equine competitors were recruited to represent their equine discipline. The photos, done in studio, lead to striking ads that stand out in publications.

Results

Luitpold experienced a double-digit increase in sales over the previous year on a 15-year-old product line.

Advancing your position.
